Case study

Project

Conversion of a former Cider Barn.

The brief

To sympathetically convert a former 17th century former cider barn to form a 4 bedroom contemporary home.

The work includes

- Removing and replacing the existing roof and timber structure including renovation of the existing 17th century king post trusses.
- Underpinning and structural repairs to the external walls.
- New precast concrete floors and mezzanines.
- Forming new window openings.
- New hard wood windows.
- Contemporary lighting and electrical work.
- Hardwood flooring.
- Installation of renewable energy source heating system.
