

Case study

Project

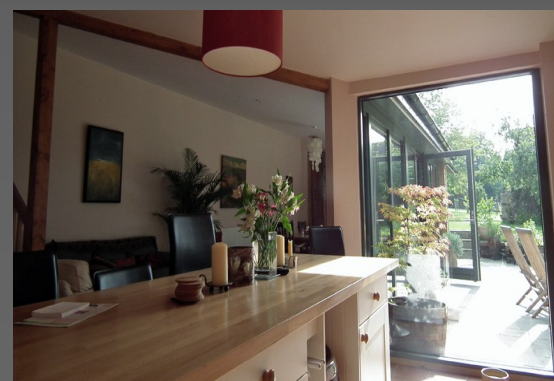

A contemporary single storey link extension and refurbishment.

The brief

To extend an existing house and link with an existing annexe to provide light and contemporary living accommodation.

The work included

- Demolition of the existing out buildings.
- Underpinning the existing structures.
- Construction of the new structure incorporating a standing seam roof, cedar cladding and composite windows and doors.
- Internal fit out including new oak stairs, ceramic tiles and decorations through out.
- External continuity works including paving, lighting and external finishes to the existing house.
